

PRESENTATION

Prime Tower

The tallest building in Zürich

Foto: Gostsens (CC BY-SA 4.0) · Wikimedia Commons

The key numbers

126 m

tall (132.6 m to the tip)

36

floors plus 2 basement levels

2011

opened on 6 December

2000

people work here

Architects: Annette Gigon and Mike Guyer, Zürich · Owner: Swiss Prime Site

CONSTRUCTION 2008 TO 2011

How the tower was built

3 years

from foundation stone to opening

5 days

for every new floor

36 000 m³

of concrete, about 14 swimming pools

6000 t

of steel reinforce the concrete

Cost: around 355 to 380 million francs for the tower and its annexes

THE FACADE

A skin of green glass

4400

glass elements without a visible frame

20 500 m²

of glass, triple-glazed and tinted green

6 cm

wide slits at the windows that open. They make the pixel pattern.

INSIDE

To the top in 30 seconds

9 lifts

travel at 6.5 metres per second

30 seconds

is all the ride to the top floor takes

1275 m²

of office space per floor, for up to 4 companies

10 metres

high is the lobby, lined with green serpentine stone

AT THE TOP

Dining above the clouds

Restaurant Clouds on the 35th floor

Restaurant, bar and lounge, opened on 12 December 2011.

Conference centre on the 34th floor

Companies hold their meetings up here.

A view to the Alps

In clear weather you can see across the whole of Zürich and the lake.

R E C O R D
